

JS Boost at Mozilla

January 2nd, 2016

What is the Toronto Hacker Club?

The Toronto Hacker Club is a student-run organization aiming to promote computer science education throughout the Greater Toronto Area. The club started out in May of 2015 when a small group of passionate computer enthusiasts banded together to create an environment where future programmers would acquire the necessary skills to succeed in their careers. At the Toronto Hacker Club we seek to educate others on the merit of a STEM and computer science education, regardless of their career path.

Since then, we have hosted multiple events, such as an Introduction to Cyber Security workshop with Lighthouse Labs in December 2016 and T.Hacks in October 2016. We have also been awarded the "Building Community through Sciences and Technology Award" by the Toronto Youth Cabinet.

What is JS Boost?

JS Boost is a 3 hour workshop for students, at Mozilla Toronto. Throughout the event, a panel of Javascript developers will introduce our participants to recent additions in React, Meteor, and Angular 2. At the end of the workshop, we invite our participants to a technology demo run by our sponsors. With an estimated attendance of around 150, JS Boost will facilitate the perfect environment for students in all fields to learn, create, and network.

Why sponsor JS Boost?

As a sponsor, your company will receive an opportunity to expose your brand to many students in pursuit of a career in software engineering. On top of that, you will be provided an opportunity to both test your product in a controlled environment and recruit talent for internship and co-op positions. Prior to JS Boost, your brand and products will be seen on our social media outlets, website, and emails. Throughout the event, we will distribute company swag to participants and can provide a table for your representatives. Representatives will have the chance to engage and inspire students as the workshop takes place.

Please refer to the provided sponsorship packages to find out which option is right for you. The listed packages are flexible and we would be happy to answer any questions that you may have. Please inquire further at contact@torontohacker.club. We are looking forward to having you as a proud sponsor of JS Boost.
